## Correction to IOS Report No. 66

It is regretted that there is an error in the following report:

Carter, D.J.T. and Challenor, P.G. 1978:- "Return Wave Heights at Seven Stones and Famita estimated from monthly maxima"

IOS Report Number 66.

The confidence limits for parameter B given in Annex A (p.19) as:

$$z_1 \hat{B} \leq B \leq z_2 \hat{B} \quad \text{should be} \quad \hat{B}/z_2 \leq B \leq \hat{B}/z_1$$

Revised figures 5 and 6, with corrected confidence limits for parameter B are attached.

(D.W. Privett)  
Librarian

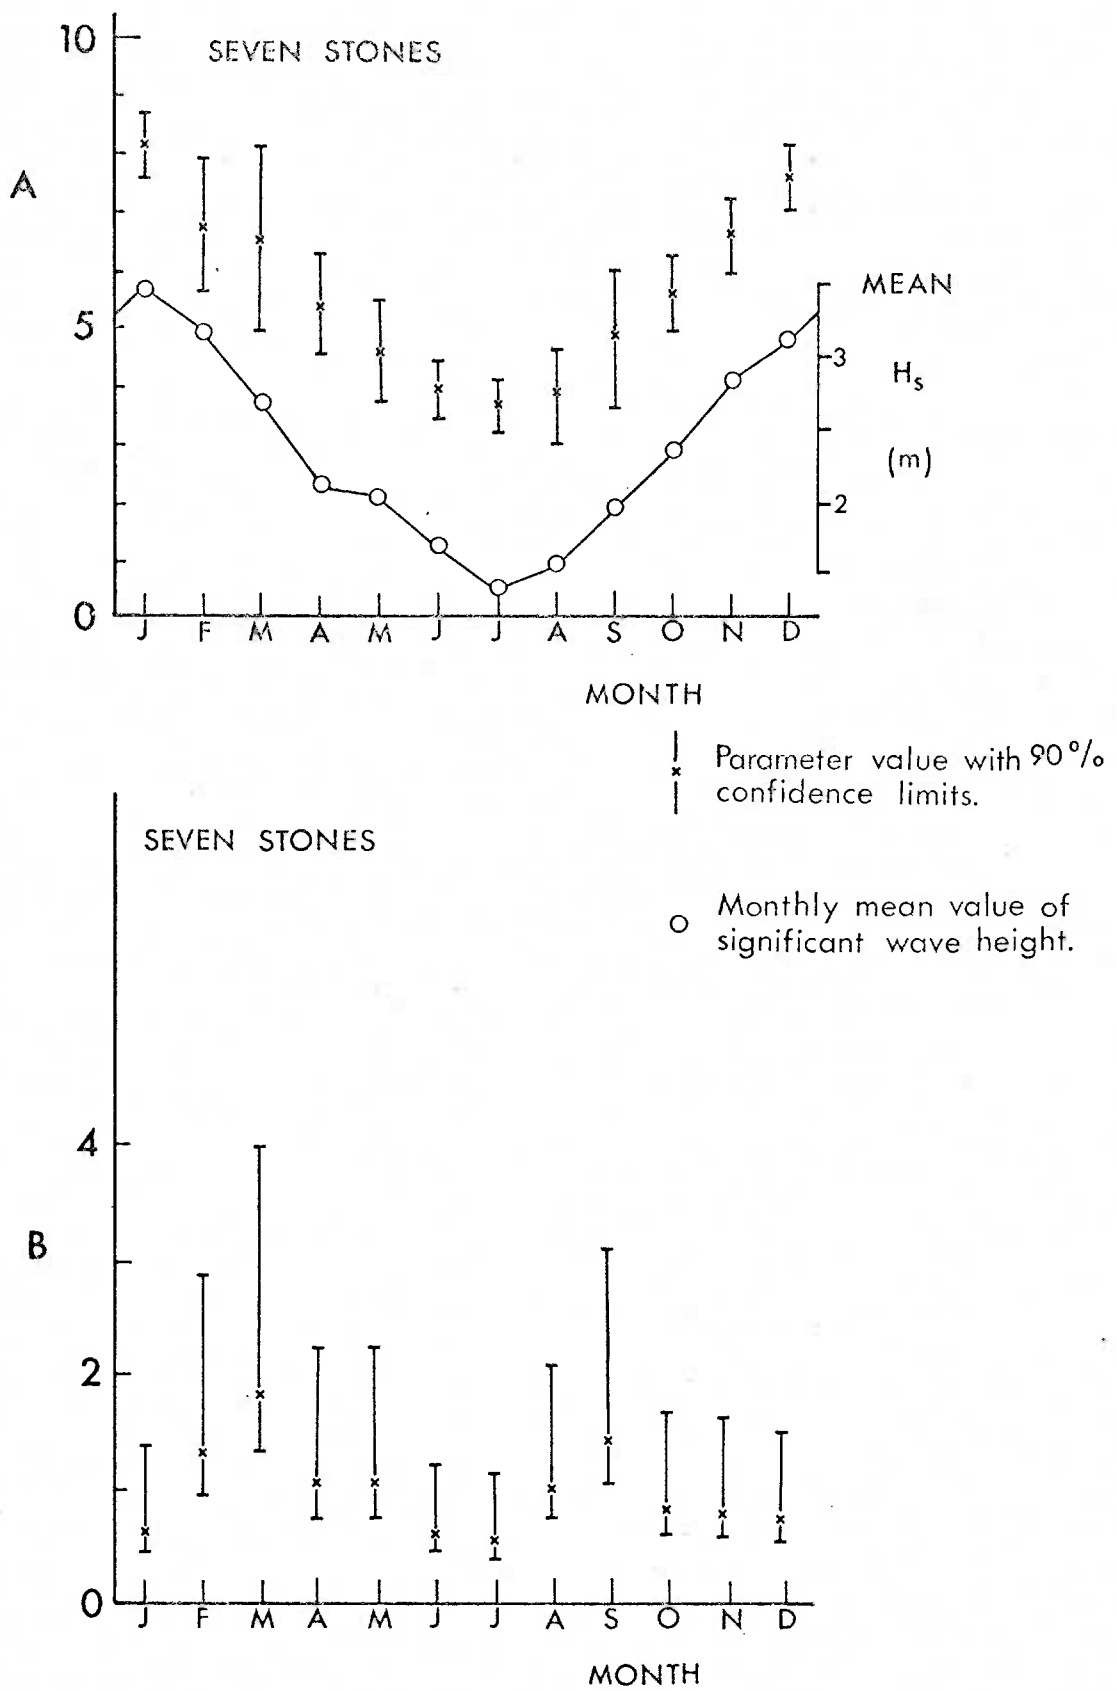

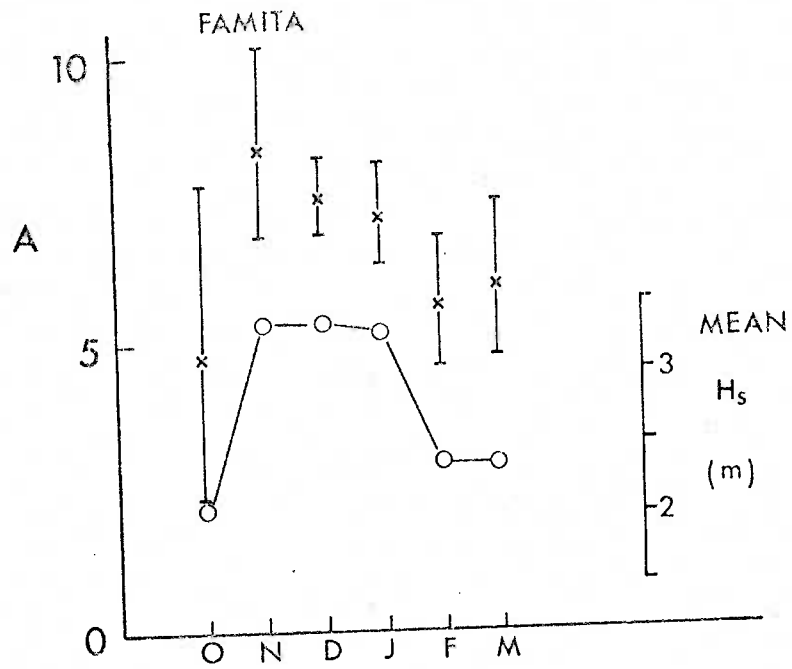

FIG. 5. Month-to-month variations in the value of the Fisher-Tippet Type I distribution parameters A & B defined by equation 1.

Parameter value with 90% confidence limits.

○ Monthly mean value of significant wave height.

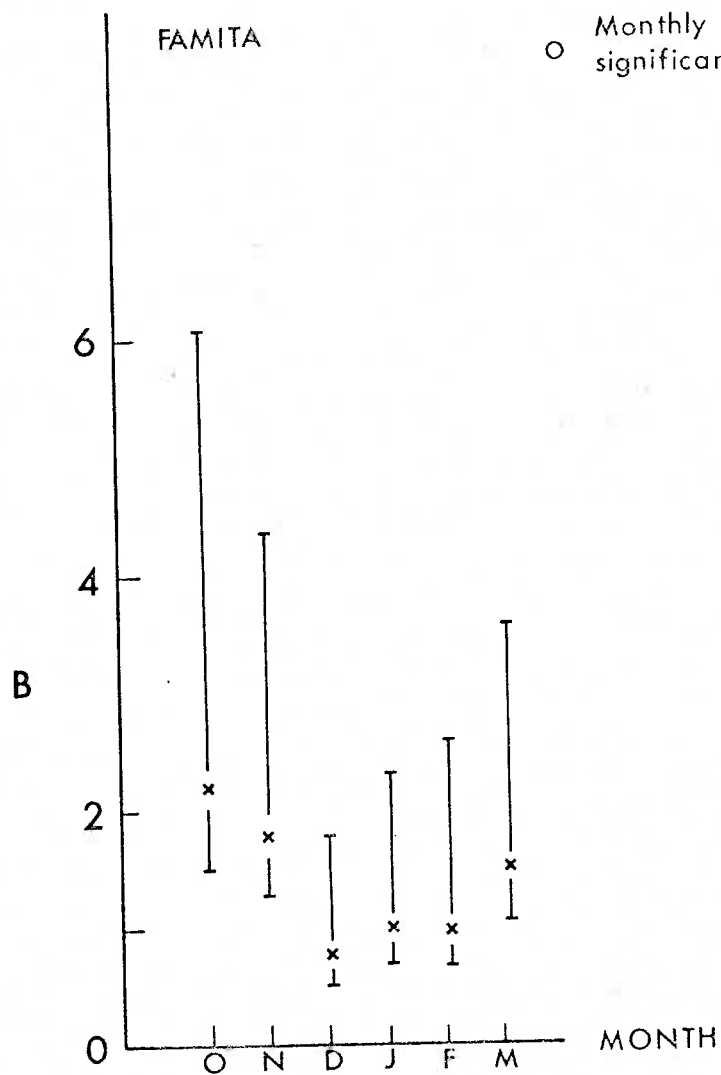

FIG. 6. Month-to-month variations in the values of the Fisher-Tippet Type I distribution parameters A & B defined by equation 1.
