INTRODUCTION

The report lists the publications and reports of the staff of the Institute of Oceanographic Sciences from 1 June 1973 to 31 December 1978.

The listing is divided into four sections, Papers, Reports, Cruise Reports and Data Reports. Papers are arranged alphabetically by the first author (whether or not that author is a member of IOS staff), then chronologically by year of publication. Reports, Cruise Reports and Data Reports are arranged by the report number.

Some of the authors listed were not strictly on the IOS staff at the time of publication quoted but were working at the Institute as visiting scientists.

An index to all Institute authors is provided.

When citing Institute of Oceanographic Sciences Reports, Cruise Reports or Data Reports, the reference should be followed by the words 'Unpublished manuscript'. The principal scientist of a cruise is designated the 'author' of a Cruise Report.

An earlier IOS Report (No.86) lists the publications and reports of the National Institute of Oceanography, Institute of Coastal Oceanography and Tides and Unit of Coastal Sedimentation, the organisations which formed the Institute of Oceanographic Sciences on 1 June 1973.
