Winchester School of Art Research Anthology

Edited by John Gillett and Beth Harland

27 art and design responses to specialists' essays on five of the University of Southampton's multi-disciplinary research themes: Life Sciences; Digital Economy; Ageing and Life-Long Health; Global Uncertainties and Security; Energy.

Winchester School of Art commissioned five research essays from specialists as starting points for the project. Research students and staff were invited to select one of the essays and make a visual response to it. The responses are reproduced here along with the commissioned essays.
