

COMPEL exists for the discussion and dissemination of computational and analytical methods in electrical and electronic engineering. The main emphasis of papers should be on methods and new techniques, or the application of existing techniques in a novel way. Whilst papers with immediate application to particular engineering problems are welcome, so too are papers that form a basis for further development in the area of study. A double-blind review process ensures the content's validity and relevance.

MANAGING EDITOR

Professor J. Sykulski

Southampton University, Southampton, UK

PUBLISHER

Claire Jones
