EdShare: Collaboration in a University for learning and teaching

EdShare

It's as easy as YouTube, and it's your University's content!

Hugh Davis, Les Carr, Sébastien François, Jessie Hey, Tim Miles-Board, Debra Morris, Su White
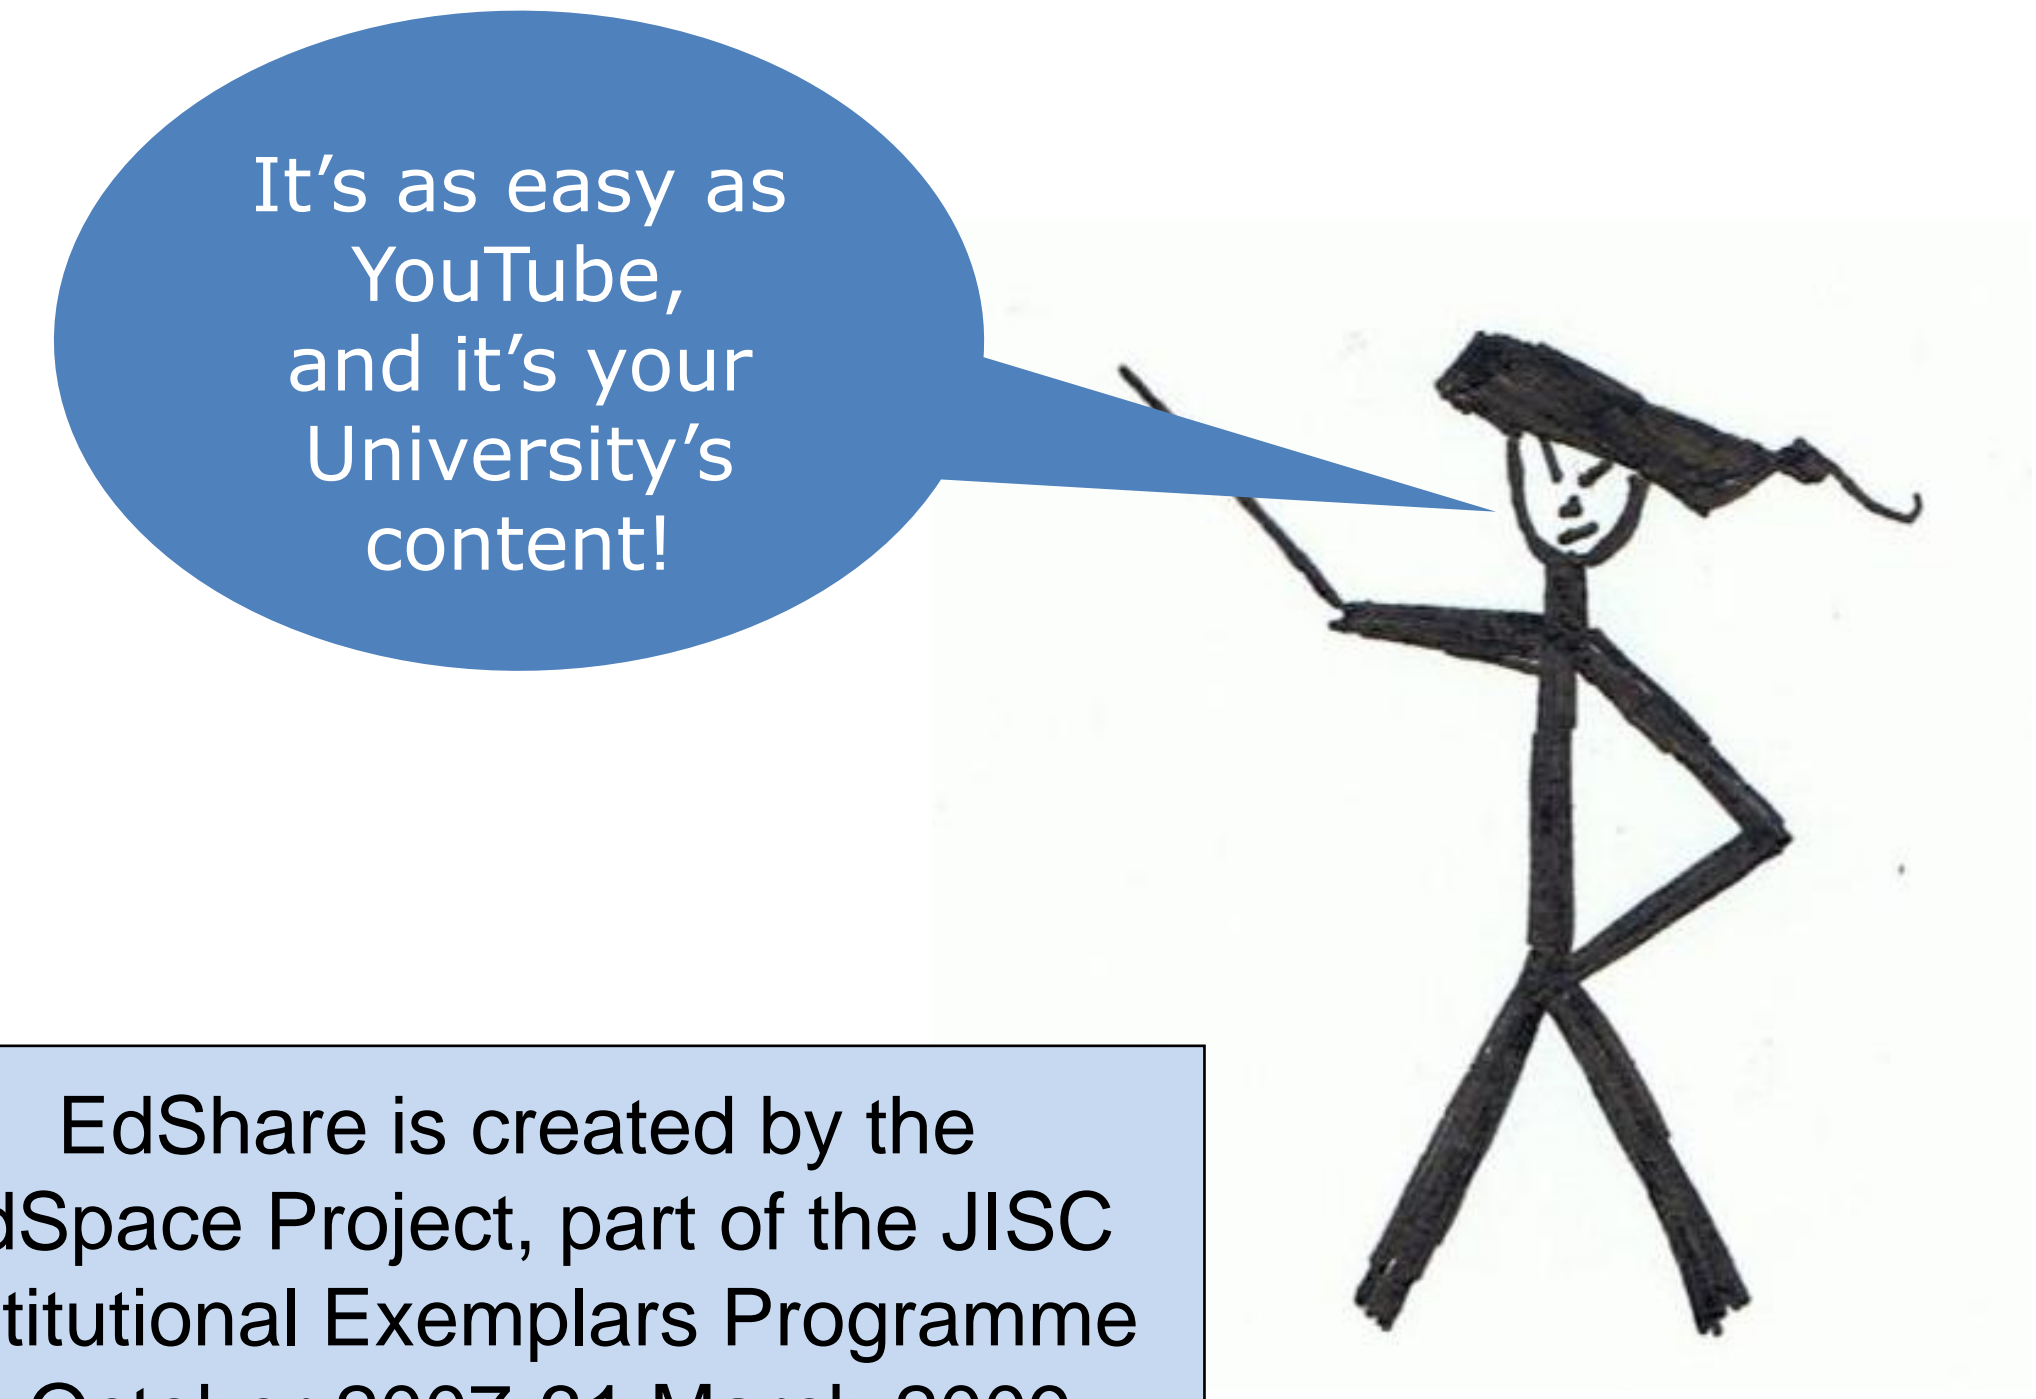

EdShare is created by the EdSpace Project, part of the JISC Institutional Exemplars Programme 1 October 2007-31 March 2009

Approach:

• Extending the EPrints platform to develop an institutional repository supporting collaboration and sharing in learning and teaching

• Using Web 2.0 content-centred presentation

• Enabling tagging and minimal inter-operable metadata to capture and present multi-media resources

• Supporting collaborative partnerships and new communities to enrich the student experience

www.edshare.soton.ac.uk
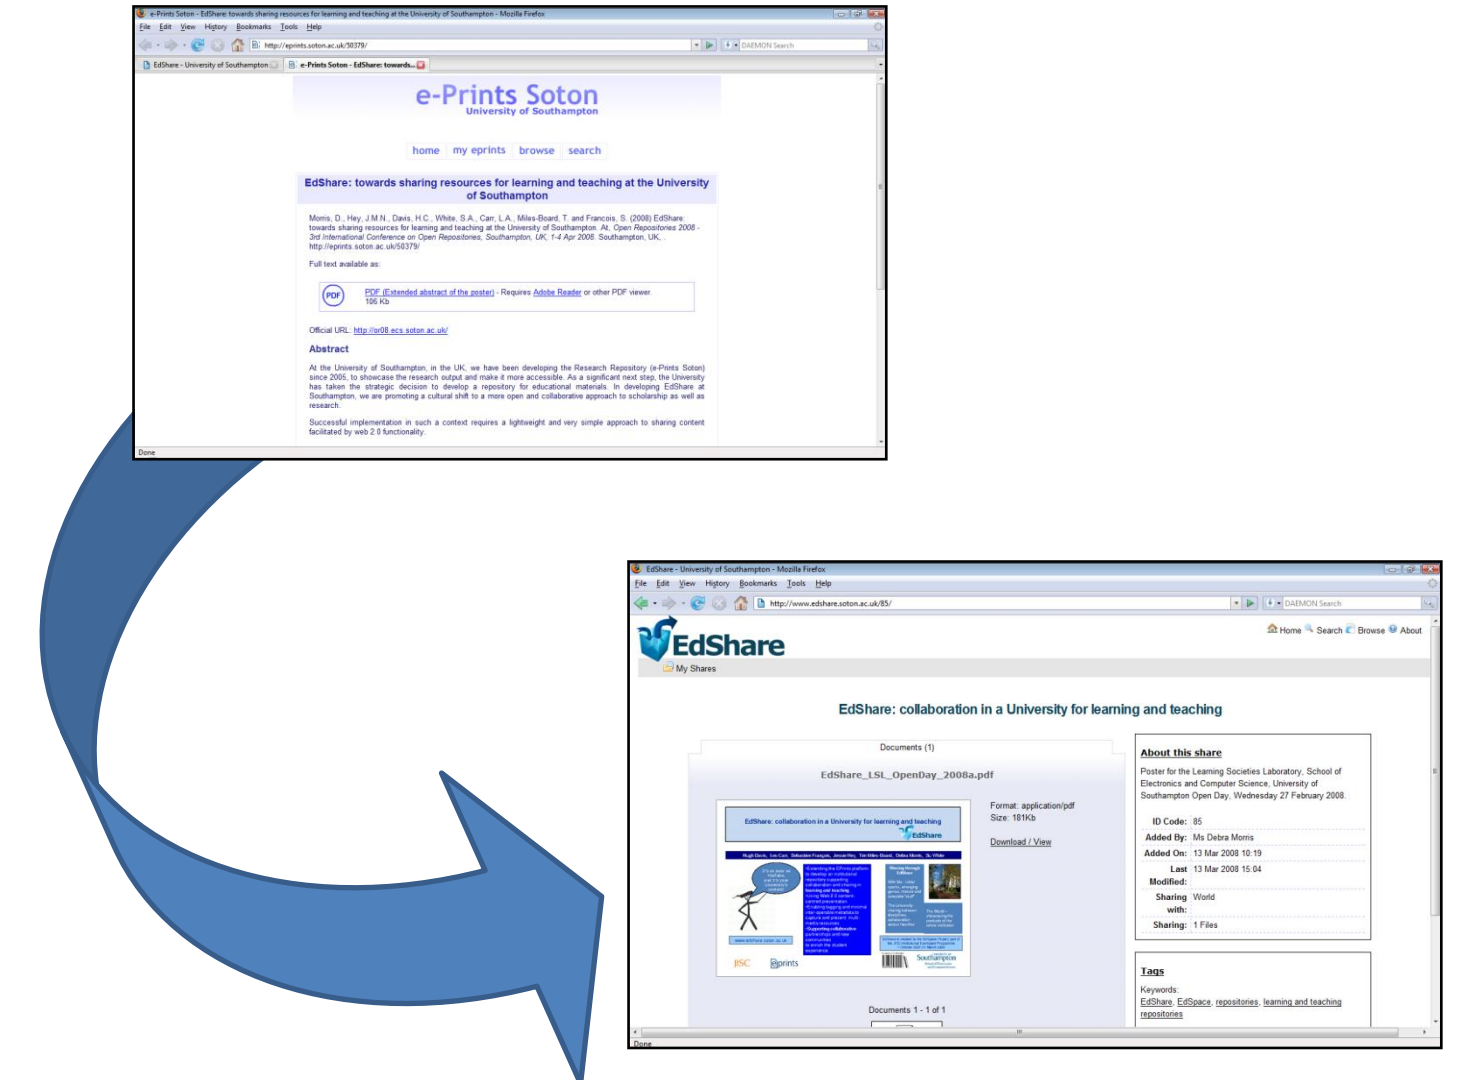

Motivations:

To enable people:
• in different faculties,
• from across the institution,

Who are:
• developing,
• designing,
• delivering,
• supporting educational materials, resources and processes,

To be able to:
• view,
• comment on,
• re-use,
• tailor,
• contribute to development of the content.

Sharing through EdShare:

Me - initial sparks, emerging genius, mature and complete "stuff"

The University - sharing between disciplines, collaboration across faculties

The World – showcasing the products of the whole institution
