from this....

to this in three months...

The screenshot shows the data.gov.uk website with a green header bar containing the HM Government logo and the site name. A dark navigation bar includes links for Home, Blog, Data, SPARQL, Apps, Ideas, Forum, Wiki, Resources, and About, along with a search bar. The main content area features a large banner titled "Unlocking innovation" with a blue molecular structure graphic. Below the banner is a paragraph about the site's purpose and a "Latest news" section with three bullet points. To the right, there are three vertical sidebar boxes: "Subscribe by RSS", "Community Log in / Sign up", and "Local Data Panel". Below the main content, there are two columns: "Search Data" with a search bar and "Browse for Data" with links to datasets and tags. At the bottom, a "Most Recent Apps" section displays three app cards: "SaferMK", "EnAKTing UK Public Sector Information Data Mashup", and "OpenGeoscience". A "Digital Engagement Twitter stream" is also visible on the right sidebar.

Unlocking innovation

Working with UK Public Sector information and data

Advised by Sir Tim Berners-Lee and Professor Nigel Shadbolt and others, government is opening up data for reuse. This site seeks to give a way into the wealth of government data and is under constant development. We want to work with you to make it better.

We're very aware that there are more people like you outside of government who have the skills and abilities to make wonderful things out of public data. These are our first steps in building a collaborative relationship with you.

Facts, figures, apps and more

Data
Looking for something specific, or just want to know more about how government spends your money? You'll find 4,600 datasets to help you get answers.

Apps
Want your phone to wake you when you get to your train station? Discover over 100 apps harnessing public data to make your life easier.

Ideas
Does Britain need a map showing which roads have been gritted when it snows? Read and note over 300 bright ideas about how the data on this website could be used.

Blogs
Does data matter? Why should it be open to everyone? Head to the blogs to find out more from the team behind this website and add your own thoughts.

Resources
Here's where you can access tools to help you analyse, adapt and share the data. You'll also find video interviews and other features to help you get more out of this website.

A first step towards freeing London's data
Visualisation by [TUC 2010](#) using London Transport data

Welcome to the London Datasore

The London Datasore has been created by the Greater London Authority (GLA) as an innovation towards freeing London's data. We want citizens to be able access the data that the GLA and other public sector organisations hold, and to use that data however they see fit - free of charge. The GLA is committed to influencing and cajoling other public sector organisations into releasing their data here too.

Releasing data though is just half the battle. Raw data often doesn't tell you anything until it has been presented in a meaningful way. We want to encourage the masses of technical talent that we have in London to transform rows of text and numbers into apps, websites or mobile products which people can actually find useful.

Join the conversation via [Google](#), [Twitter](#) or [email](#) and give us your thoughts and feedback - we want to make this site work for you!

data.southampton.ac.uk

The image displays two side-by-side browser windows. The left window shows the 'Open Data Service' website, which includes a navigation menu on the left with links like 'Data', 'Frequently Asked Questions', 'Apps', 'Data Catalogue', 'Places', 'Phonebook', 'Academic Programmes', 'Organisation', 'Jargon', 'Products & Services', 'SPARQL Endpoint', 'Feedback', 'Suggestions', 'Report a Problem', 'Register an App', and 'Credits'. The main content area features the 'University of Southampton Open Data' header, a brief description of the service, a 'Featured App: Open Data Map' section, and a 'Linked Open Data' section with an executive summary and links to presentations. The right window shows the 'University of Southampton Linked Open Data Map', a map of the university campus with various data points represented by icons. A tooltip for a 'Beverage Vending Machine (Westomatic solo)' is visible. The map also includes a search bar, map controls, and a list of datasets used.

Open Data Service beta

University of Southampton

#opensoton

University of Southampton > Open Data

University of Southampton Open Data

The University of Southampton provides open access to some of our administrative data.

We believe that this will be of benefit to our own members and visitors, and increase the transparency of our operations.

Featured App:
Open Data Map
This tool is under development by Postgraduate students, it's a work in progress and so may break now and then, but it looks amazing. You can search for services on and near our campuses!

Linked Open Data

The executive summary: There's data we have which isn't in any way confidential which is of use to our members, visitors, and the public. If we make the data available in a structured way with a license which allows reuse then our members, or anyone else, can build tools on top of it without needless bureaucracy. That's common sense. We call it "Open Data".

For more on Open Data and its benefits see [these presentations](#) by Southampton's Nigel Shadbolt and Tim Berners-Lee. They helped establish data.gov.uk the UK Government's Open Data site and are members of the Coalition Government's Transparency Board.

We publish our data in RDF format and link our identifiers to [other sites in the Linked Open Data Web](#). This makes it much easier to merge data from multiple sources and other sites can link their datasets up with ours. Like the HTML Web, the whole is much greater than the sum of its parts, that's "Linked Data".

Show me the data!

Browse the [list of datasets](#) or view the links on the left to explore some

Interview with Christopher Gutteridge
There's an interview with Christopher Gutteridge (me!) on this weeks Ubuntu UK Podcast. (If you're wondering, data.southampton.ac.uk runs on virtual machine running Ubuntu) Actually, it's worth giving a shout out to the technologies we use, but I'll save that for a future post.

[April 1st Gag] PDF selected as Interchange Format
The following article is our prank for April 1st. Just to be clear PDF is a dreadful format to exchange data in. It was inspired, in part, by The Register website running the following picture and quote. Yes, I did say that, but I was talking about research and data communication. It was fun working [...]

New Formats
New ways to enjoy our data. We've added some links to the "Get the Data" box which let you see what formats are available. Some pages let you download RDF, others you can get back as tabular data, suitable for loading into Excel, amongst other things. Roughly speaking, pages about things have RDF versions, pages [...]

Grasping the nettle and changing some URIs
We've realised that using UPPER CASE in some URIs looked fine in a spreadsheet but makes for ugly URLs, and if we're stuck with them, we want them to look nice. Hence I've taken an

The screenshot shows the data.gov.uk website with the 'Opening up government' banner. The navigation bar includes links for Data, Apps, Ideas, Forum, Blogs, and Consultation. The 'Apps' section is highlighted, displaying a list of applications: 'See UK' (with a map), 'BUSit London', 'Carehome Map', 'UK Post Box', 'UK Pharmacy', 'UK Crime Stats', and 'London Cycle Hire'. The 'Numberhood' app is featured prominently, showing a 'color time series view' of population and crime data on a mobile device screen. A 'PAUSE' button is visible at the bottom right of the app preview.

Open Government Licence
for public sector information

delivered by
The National Archives
[Back to The National Archives](#)

You are encouraged to use and re-use the Information that is available under this licence, the Open Government Licence, freely and flexibly, with only a few conditions.

Using information under this licence

Use of copyright and database right material expressly made available under this licence (the 'Information') indicates your acceptance of the terms and conditions below.

The Licensor grants you a worldwide, royalty-free, perpetual, non-exclusive licence to use the Information subject to the conditions below.

This licence does not affect your freedom under fair dealing or fair use or any other copyright or database right exceptions and limitations.

You are free to:

- ✓ copy, publish, distribute and transmit the Information;
- ✓ adapt the Information;
- ✓ exploit the Information commercially for example, by combining it with other Information, or by including it in your own product or application.

You must, where you do any of the above:

- ▲ acknowledge the source of the Information by including any attribution statement specified by the Information Provider(s) and, where possible, provide a link to this licence;

If the Information Provider does not provide a specific attribution statement, or if you are using Information from several Information Providers and multiple attributions are not practical in your product or application, you may consider using the following:

Contains public sector information licensed under the Open Government Licence v1.0.

- ▲ ensure that you do not use the Information in a way that suggests any official status or that the Information Provider endorses you or your use of the Information;
- ▲ ensure that you do not mislead others or misrepresent the Information or its source;
- ▲ ensure that your use of the Information does not breach the Data Protection Act 1998 or the Privacy and Electronic Communications (EC Directive) Regulations 2003.

can we

- retain simplicity
- remain agile
- be non partisan
- clone and replicate
- build the ecosystem
- speak up...

for those of us in the UK this means

- the ODC
- <http://data.gov.uk/opendataconsultation>
- the PDC
- <http://discuss.bis.gov.uk/pdc/>
- urge you to contribute

see also

<http://data.gov.uk/blog/transparency-board-urges-widest-possible-response-to-consultations>

1. the value of data is not in its sale but its widespread use
2. primary mission maximise the overall contribution of data and services to economic growth, innovation, public service improvement and efficiency
3. a clear commitment to release more and more data as Open Data over time
4. incentives for the management of trading funds cannot always be aligned with the long term public interest
5. a structure which protects the vital national interest in the data especially core reference sets
6. there should be a substantial additional release of useful data on an open basis
