

Dr Leslie Carr,
Web Science Doctoral Training Centre & EPrints Open Access Software Centre
Web and Internet Science Research Group,
University of Southampton, UK

Introduction

- Computer Science lecturer
- Research interests: hypertext, knowledge management, open access, open data, open education, extended cognition, distributed information systems
- The Web!
- Open Source software supporting Open Access to Scientific and Scholarly Knowledge
 - EPrints

Web & Internet Science Research Group

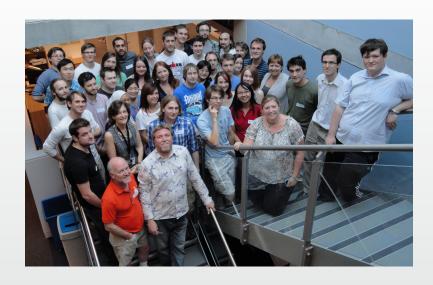

- 20 faculty, 70 PhDs, 60 masters
- Masters courses in
 - Web Science
 - Web Technology
- Doctoral Training Centre

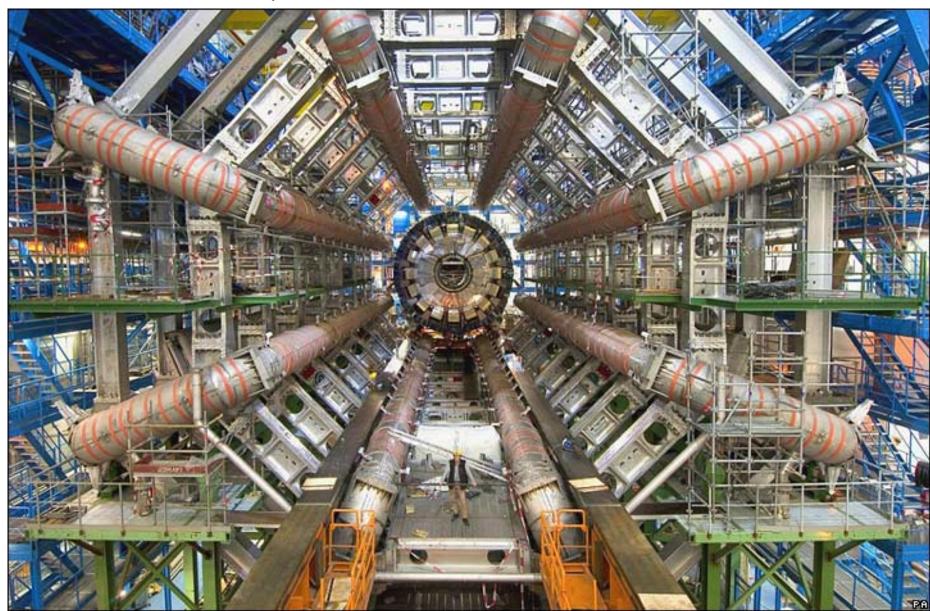

Why Web Science Matters

Quiz: Where's This?

Quiz: What's This?

Remember These 2006 Headline?

Birth of the Web

- From an underground nuclear bunker on the Swiss border, something did escape
- In 1989 the Web took over the academia, industry and the rest of the world

Less successful Webs from history

Sponsor	System	Scope	Real	Date	Important Properties
Finance / Press	Reuters	Professional, centralised	•	1850	News & stock information (originally carrier pigeon and subsequently telegraph)
Private Institution	Mundaneum	Public, centralised	~	1920	Based on indexing technology (the library card)
Military	Memex	Scholarly, individual, centralised	×	1945	Aimed at Scientists and Technologists in WWII
Media	Xanadu	Public, decentralised	×	1960	Focused on DRM, reuse and writing for "creatives"
Media	CEEFAX	Public, national, centralised	~	1970	Broadcast, linked, not participatory
Government	Minitel	Public, national, centralised	~	1980	Commercial services and information
Academy (CS & HEP)	FTP / Archie / Anarchie	Public, decentralised	V	1985	Downloaded resources (papers, reports) to hard drives and printed them on LaserWriters.
Commerce	Hypercard, HyperTIES	Private, centralised	~	1988	Personal applications, sometimes tied to multimedia resources on CDROMs / video disks
Academy (HEP)	www	Public, global, decentralised	V	1990	Universal naming, linking, interoperability, participative. However no writing, no indexing.
Academy (CS)	Microcosm	Private, centralised	/	1990	Sophisticated linking and openness for personal information stores
Academy (CS)	HyperG	Public, centralised	~	1990	Extension of Web for with support for writing, indexing and consistency management.
Commerce	AOL, CompuServ	Public, centralised	~	1990	Dialup access to email, forums, chat rooms and information resources

Society is Diverse. One Web Fits All?

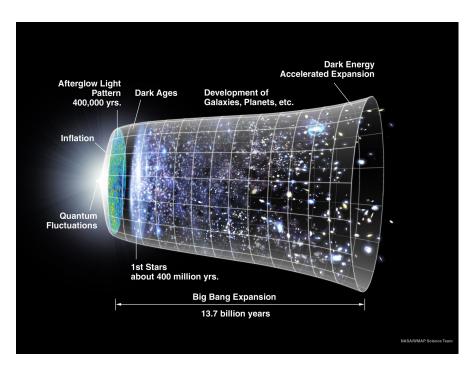

Institution	Objective			
Academy	Create and transmit knowledge			
Commerce	Make and trade goods			
Press	Investigate and report news			
Media	Create and broadcast content			
Police	Maintain order and public surveillance			
Judiciary	Apply law and resolve disputes			
Government	Control society and share resources			

The development of society as a whole (nuanced and structured and refined) is inextricably related to the technology of information provision, consumption and dissemination (e.g. writing, reading, printing, education). Different parts of society have different objectives and hence incompatible Web requirements, e.g. openness, security, transparency, privacy.

Expansion of the Web

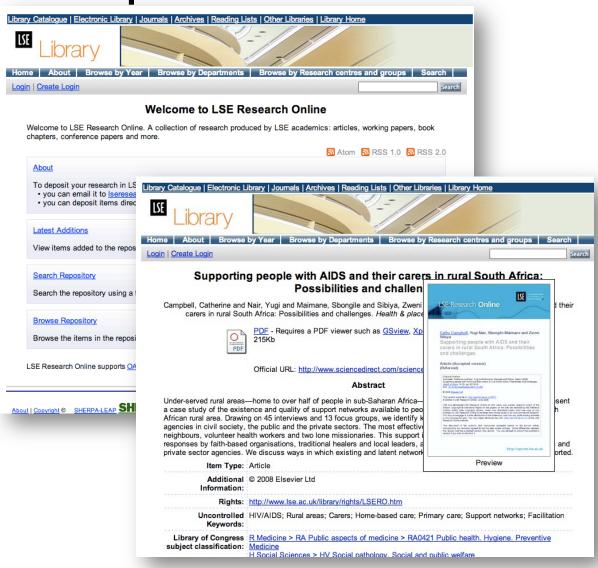

- The Web spread the conditions of its initial creation throughout the whole of society as it underwent an initial inflationary phase.
- The academy
 - government patronage
 - large-scale co-operation
 - sharing of intellectual property

Openness Agendas

- Open Access to Research Outputs
 - Supported by all UK Research Councils
 - Heavily promoted by JISC
- Open Research Data
 - Demanded by government, private funders
 & UK Research Councils
 - Move from closed VRE / EScience environment
- Open Educational Resources
 - Move from closed VLEs to sharing resources

Open Research Publications

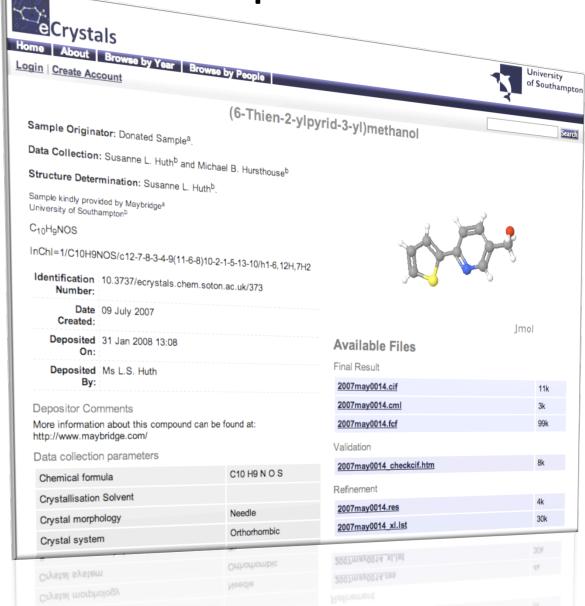

Institutional repository for the London School of Economics http://eprints.lse.ac.uk/

One of 145 UK Institutional Research repositories

- Norway 47
- Sweden 58
- Denmark 9
- Finland 9

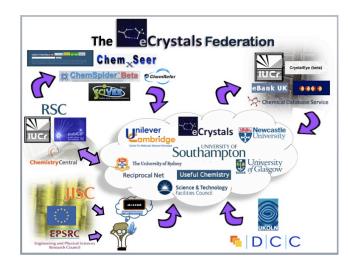

Open Scientific Data

A repository of chemical data JISC EBank project (2003)

Scientific, not bibliographic, metadata.

Run by the UK Crystallographic Service and latterly an international consortium.

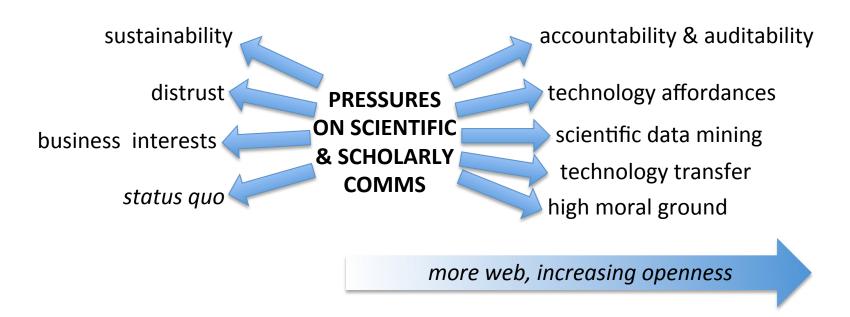

Open Educational Resources

- JISC EdSpace Project
- IEEE LOM metadata
- Web 2, informally tagged
- Sufficient for discoverability and usefulness

Directions for Researchers

- Open Access, Open Data, Open Educational Resources
 - Web Technology joins the High Moral Ground
- vs the established economic model for ensuring continuity of information production
 - trading of privately held information through subscription products such as journals or magazines

UEA appeared to support a culture of "resisting disclosure of

information to climate change sceptics". The committee chairman, Phil Willis, described this as

"reprehensible".

Climate science must be transparent and irreproachable, the Ω_{W} committee said.

Climategate

• sClimate Research Unit at UEA refused to provide research data upon which its publications had been based

chael M rit: Climate science must be more open, say MPs

By Roger Harrabin Environment analyst, BBC News

MPs investigating the climate change row at the UK's University of East Anglia (UEA) have demanded greater transparency from climate scientists.

The Commons Science and Technology Committee criticised UEA authorities for failing to respond to requests for data from climate change sceptics.

31 March 2010

Roger Harrabin Environment analyst, **BBC News**

"It is not standard practice in climate science to publish the raw data and the computer code in academic papers," its report said.

"We consider that climate scientists should take steps to make available all the data that support their work, including raw data... and full methodological workings, including the computer codes."

"When the prices to pay are so large, the knowledge on which these kinds of decisions are taken had better be right," the report stated.

Open Government Data

 Same principles work on the government

Transparency

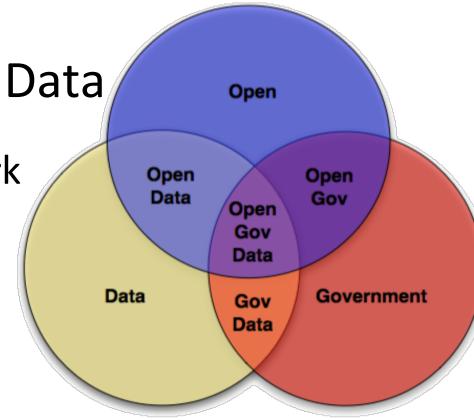

- Openness
- Innovation
- Enabling new value & new businesses

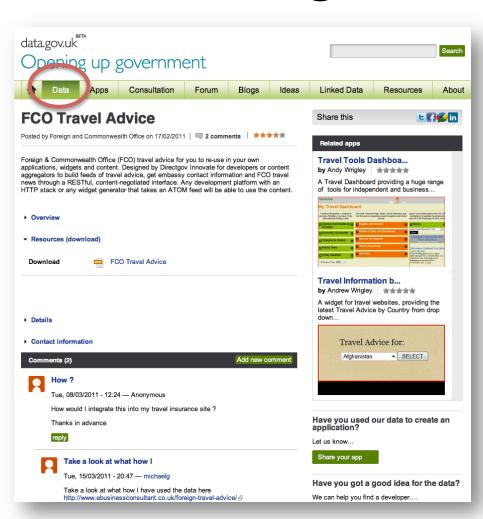

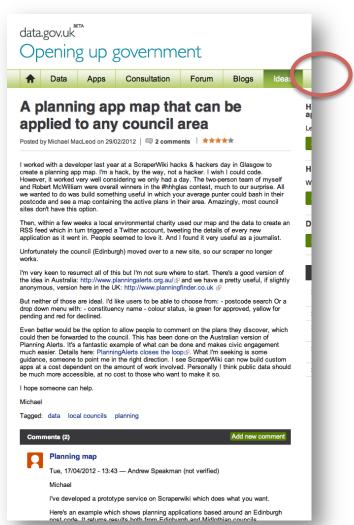

data.gov.uk (8,300 data sets)

Bespoke apps produced by independent developers for government data

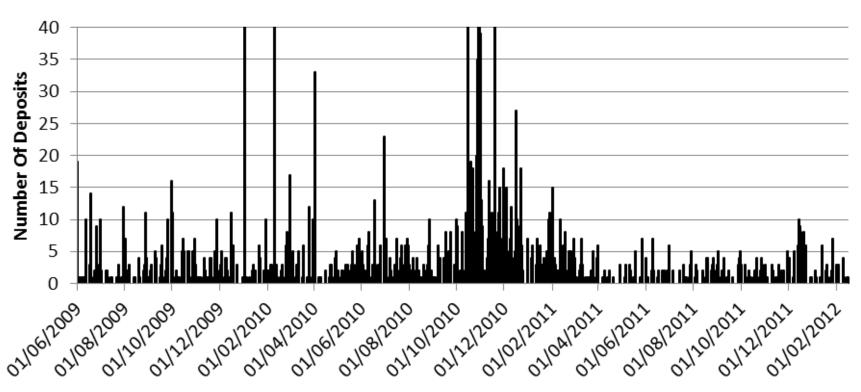

Shared ideas: Michael built a 'planning proposals' web app. Some turned it into an RSS feed. Someone else turned that into a Twitter feed. Someone else used scraperwiki...

Data.gov.uk - What's Available

- -Over 8,300 datasets now
- -Frequent deposit activity of medium sized dataset deposits
- -Signs of a healthy data catalogue

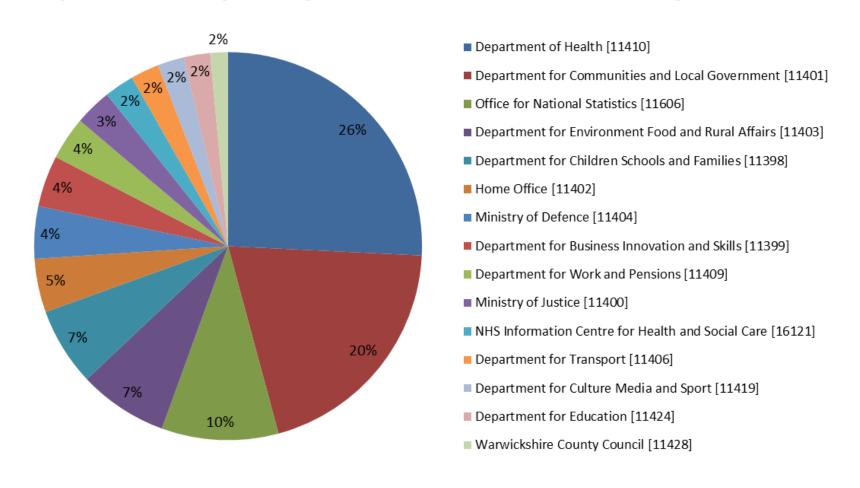

Dataset Deposits made in Data.gov.uk

Data.gov.uk - Who's Publishing It

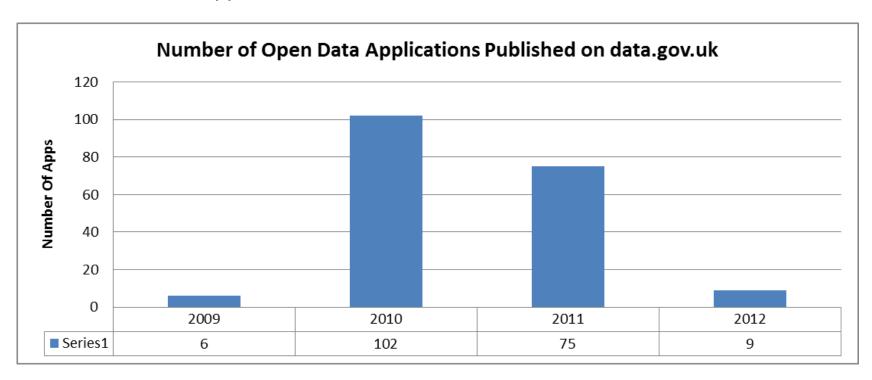

- 406 departments supplying data
- These include national Government departments, local government, and local council

Departments Depositing >1% of Total Datasets in data.gov.uk

Data.gov.uk - Who's Using It

- 197 Applications available on Data.gov.uk
- Ranging over multiple topics of interest
 - Transparency Apps
 - Transport Apps
 - Public Health Apps

Institutional Apps

Application created by 4 students using the following datasets:

- Buildings and Places
- Catering
- Local Amenities
- Southampton busroutes
- Southampton Bus-stops
- Teaching Room
 Features
- Ordnance Survey Data

How Does Open Data Work?

- Make catalogue of all the things you know
- Give each thing a permanent web name (URL)

Publish information about that thing

on the Web with an open license

** Use a machine readable format

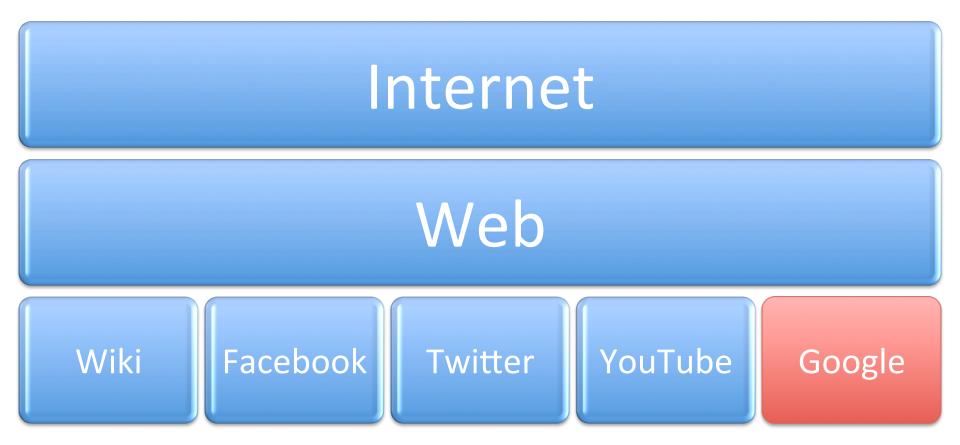

★★★ Use a standard data format

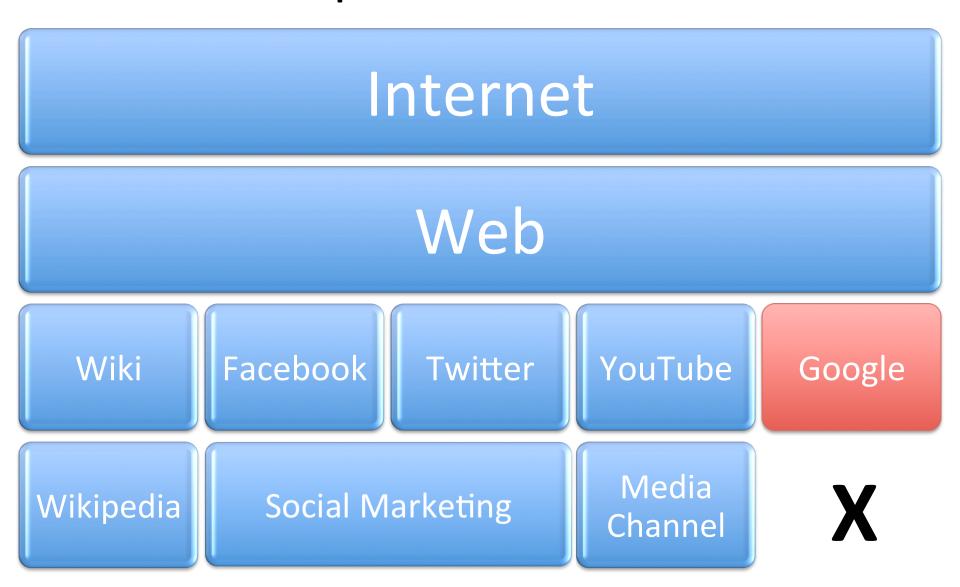

★★★★ Use an open standard data format

★★★★★ Mention other things using their web URLs

Internet

Internet
Web

Why Closed Knowledge Systems are Bad

Evaluation

Did Germany make the right choice in relocating their post-unification capital to Bonn?

Synthesis

Create a set of guidelines for choosing alternative national capitals in a post-climate change Europe.

Analysis

What were the overriding factors in the choice of sites for the European parliament and commission?

Application

Choose the most appropriate capital for the Isle of Wight

Comprehension

Why is Paris the capital of France?

Knowledge

What is the capital of France?

ncreasing educational capabilities

Bloom's Educational Taxonomy demonstrates why closed knowledge systems are bad

Open Source, Systems, Data + Us = Open Society

- The Web isn't a thing but an activity
 - the creation of a network of information by a network of individuals.
- The Web wasn't invented by Tim Berners-Lee,
 - it is still being invented by all of us as we gradually adapt our tools and change our practices

The Web is an extraordinary change in the ability of humankind to build value and to be valuable

The product of people with open license, open standards, open systems
