Key Ideas in Teaching Mathematics

- A website providing research-based guidance for teaching the key ideas of mathematics to 9- to 19-year-olds.
- Includes over 60 links to online activities and resources.
- Covers algebra, ratio, measurement, spatial and geometric reasoning, data, uncertainty, and relations between variables.
- The activities have been selected by experienced teachers and researchers: Anne Watson, University of Oxford; Keith Jones, University of Southampton; and Dave Pratt, Institute of Education.
