Figure 1

Families assessed for eligibility  
N = 3751

- Ineligible  
  N = 1717

Eligible families  
N = 2034

- Not willing to participate  
  N = 787

Recruited  
N = 1247

- Dropouts  
  N = 77

Deliveries  
N = 1170

- < 3 BMI measurements  
  N = 150

≥ 3 BMI measurements from birth to 18-months  
N = 1020
(A) Associations between BMI peak characteristics with cardio-metabolic markers at 48-months
(B) Relative risk and 95% CI of overweight and pre-hypertension at 48 months according to BMI peak characteristics
