Interactive whiteboards:
Some lessons from the classroom

Julie-Ann Edwards, Mike Hartnell and Rosalind Martin

One of the phenomena of being involved in Initial Teacher Education is the opportunity to observe teachers who are integrating ICT into their classrooms, and learning about new tools and techniques. The present article describes an experiment that was set up to see whether ICT could be used to enhance discussion in the classroom.

It was hypothesized that the use of an interactive whiteboard would allow the teacher to draw, in the whiteboard, the kind of graphs that would be useful in illustrating the concepts being taught. The use of an interactive whiteboard would allow the teacher to draw in the whiteboard, the kind of graphs that would be useful in illustrating the concepts being taught.

Interactive whiteboards are devices that allow the teacher to draw on the whiteboard, and have the option to record their drawings. The use of an interactive whiteboard would allow the teacher to draw in the whiteboard, the kind of graphs that would be useful in illustrating the concepts being taught.

Results

The results of the experiment were quite promising. The use of an interactive whiteboard was able to improve the quality of the discussions in the classroom, and to help students understand the concepts being taught. The use of an interactive whiteboard was able to improve the quality of the discussions in the classroom, and to help students understand the concepts being taught.

One important lesson that was learned from this experiment is that interactive whiteboards can be useful tools in the classroom. Interactive whiteboards can be useful tools in the classroom. Interactive whiteboards can be useful tools in the classroom. Interactive whiteboards can be useful tools in the classroom. Interactive whiteboards can be useful tools in the classroom. Interactive whiteboards can be useful tools in the classroom. Interactive whiteboards can be useful tools in the classroom. Interactive whiteboards can be useful tools in the classroom. Interactive whiteboards can be useful tools in the classroom.
