

Read me file:

University of Southampton – ECS – Abiodun Komolafe – [a.o.komolafe@soton.ac.uk](mailto:a.o.komolafe@soton.ac.uk)

The excel file contains experimental data for the paper. In particular:

Figure 3: The resistance changes for gauges on Bari fabric along the warp and weft weave in negative and positive bending modes

Figure 4: The resistance changes for gauges on Escalade fabric along warp weave direction in negative and positive bending modes

Figure 5: The resistance change of gauges on Escalade fabric along the weft weave in negative and positive bending modes

Table 2: The resistance changes of PES fabric and Lagonda fabrics along the warp and weft direction in positive and negative bending modes

Date of data collection: from April 2014 – December 2014

Information about geographic location of data collection and analysis: University of Southampton, UK

Date that the file was created: February 2015
