

A Note on the Research Data:
Aerofoil trailing-edge noise prediction models for wind turbine applications

Alex Siu Hong Lau, Jae Wook Kim, Jeremy Hurault, Tomas Vronsky and Phillip Joseph

Wind Energy 20 (2017) 1727-1752 (doi: 10.1012/we.2119)

The content of the data files:

The ZIP file contains the ASCII data files and the Tecplot layout files that were used to generate and plot the figures in the paper. The titles of the files are self-explanatory. The column headings are not included in the files since they are already indicated by the axis titles of each figure shown in the paper. The graphic software Tecplot 360 EX can be downloaded from

<http://www.tecplot.com/my/free-trial-software/tecplot-360/>

for free (fixed-period trial version). For any inquiry, please contact the corresponding author Jae Wook Kim (j.w.kim@soton.ac.uk).

Duration of data collection:

From September 2016 to March 2017.

Information about geographic location of data collection:

University of Southampton, United Kingdom.

Date that the ZIP file was created:

6 March 2018.
