

The diagram illustrates the 'Consequences of metabolic dysfunction and excess adiposity' as a classical building facade. The facade features a triangular pediment at the top containing the title text. Below the pediment are six columns, each representing a different consequence. The consequences are: CVD, CKD, Prediabetes and diabetes, Cirrhosis, liver failure, liver transplant, Cancers, Sleep Apnea/Sleep Disorders, and Joint diseases. Each column is light blue with black text, and they are separated by white columns.

Consequences of metabolic dysfunction and excess adiposity

CVD

CKD

Prediabetes
and diabetes

Cirrhosis,
liver failure,
liver transplant

Cancers

Sleep Apnea/
Sleep Disorders

Joint diseases
