**8: THIRD MILLENNIUM MESOPOTAMIAN
CERAMICS: POTTERY CORPUS**

8 **THIRD MILLENNIUM MESOPOTAMIAN CERAMICS: POTTERY CORPUS**

8.1 **INTRODUCTION**

Any examination of a large body of archaeological material is subject to the difficulties of presenting the data in a compact and retrievable form.

Some two thousand nine hundred samples are included in the corpus. Such a considerable bulk and variety of material has necessitated cataloguing the results (see Section 8.2) in order to achieve the requirements of a concise and accessible format. The pottery catalogue constitutes the primary source of information and reference is made to further details provided in a series of additional tabulations which present the classification of vessel types (Table 8.1) and fabrics (Table 8.3) and which record the results of scientific analyses performed on individual samples (Tables 8.5, 8.6 and 8.7).

Chronological distinctions apparent from a combination of vessel type and fabric are most marked in comparisons between ED I and ED III pottery assemblages. Early ED I fabrics often bear a marked resemblance to those common in middle to late Uruk pottery sequences, suggesting the possibility that technological changes observed in fabric types correspond with the chronological distinctions.

A number of middle to late Uruk pottery types from each of the three principal sites being examined (Ur, Abu Salabikh and Kish) have therefore been selected for inclusion in the pottery corpus.

8.2 CERAMIC CLASSIFICATION AND ANALYSIS

8.2.1 Introduction

The classification and analysis of Mesopotamian ceramics principally of the third millennium forms an archive of material from which it is possible to correlate a chronological assessment of pottery types with a classification of the fabrics. This information is presented in a pottery catalogue (Table 8.4) which includes references to the results of analyses conducted on individual samples, incorporating both petrographic and trace element analyses (see Sections 8.3, 8.4 and 8.5).

The catalogue provides the basis both for a regional study of the ceramic industry and for examining trends within the ceramic sequence at an intra-site level. It provides the data from which regional exchange between Babylonia and sites north of the middle Euphrates may be identified, coupled with evidence for long distance trade with sites as far south as the Gulf states (see Sections 4 and 5).

The information includes both published and unpublished material from excavations currently in progress together with samples taken from museum collections. Wherever possible the vessels and sherds have been illustrated (Figs 8.13 - 8.91) and, where excavated material has been published, reference has been made to illustrated forms.

8.2.2. Explanation of the pottery catalogue (Table 8.4)

The catalogue has been divided into twelve columns and a numerical system of coding the columns is intended to enable computerisation of the data if necessary. Where there are no available data for an entry under a specific column this is indicated by a dash. Of the twenty-three sites included in the corpus only three have been extensively sampled: Ur, Kish and Abu Salabikh. The samples from both Ur and Kish are derived from museum collections. All vessels included from Abu Salabikh, however, have been recorded either whilst excavations were in progress or subsequently from site records. Where ceramic assemblages have been examined from museum collections sampling procedures have been subject to the limitations and restrictions discussed in Section 2.2. A more rigorous and

intensive sampling procedure, however, has been applied to the pottery from Abu Salabikh. The advantage of sampling conducted during the progress of excavations has been to produce a considerable body of data which can be quantified according to pottery type, date and fabric. The result of this intra-site study has helped to validate comparisons between pottery types dated on the basis of fabrics, as well as indicating technological differences within a chronological and a typological framework (see section 4).

The pottery samples have been grouped initially according to site, beginning with Ur (the southernmost site from which material has been examined) extending to the sites of the Diyala and Hamrin Basin and ending with Umm an Nar and Hili in the Oman.

The entries for each site have been arranged according to the typological classification (Table 8.1). Thus conical bowls (1.1) are placed before solid-footed goblets (1.3.2.). Each entry is assigned a reference number which is cited in column 1 of the catalogue. The running number from 0001 to 2915 therefore identifies the individual samples.

MUSEUM/SITE NUMBER (COLUMN 2)

The majority of samples come from museum collections. The registered museum number of each pot or sherd is recorded, together with an excavation number if this is traceable, in column 2 of the catalogue. Occasionally there is no recorded accession number and in these circumstances the name of the museum, followed by the abbreviated form 'no acc.', indicates the absence of any registration.

The pottery from Abu Salabikh is catalogued according to batch (level) number and these are arranged in numerical order within each area of the excavation. There are four sub-divisions within the pottery group from Abu Salabikh, namely Main Mound, Area E; Main Mound, Area A; the North-East Mound and the West Mound. Owing to an anomaly in the recording sequence the single exception to this is the pottery from batch number 5212. This is grouped with the pottery batches of the '5000's' from the West Mound although the batch of pottery comes from Area E. The context, however, is duly noted in column 5 and as the pottery is from an ED III context the samples are easily separated from the middle to late Uruk and ED I pottery from the West Mound.

DATE (COLUMN 3)

The material sampled ranges from the late fourth millennium B.C. (middle to late Uruk) through to the end of the third millennium (Akkadian). The majority of the pottery, however, may be dated to the Early Dynastic period. In some instances the date of the context may differ from the typological date of the pottery, particularly when the samples are derived from grave groups. However, a method has been adopted to indicate the date of the sample followed by a question mark when the date is based upon a combination of fabric classification and typological attributes rather than specifically upon the date of the context. Problems occur when there is no information concerning the context of the sample, and in such instances a broad date band is assigned to the sample. For example, the conical bowls from Ur are simply dated to the Early Dynastic period although it has been possible to show chronological trends in rim diameters for conical bowls from Abu Salabikh. The pottery from Ur has proved to be the most difficult to categorise chronologically although the information from the fabric types has helped to narrow the date. The Ur sherds from the Birmingham Museum collections are instructive since many of them exhibit the characteristics of ED I and late Uruk fabrics (see Sample nos. 0303 to 0349).

The use of the term Jamdat Nasr to denote the 'Jamdat Nasr period' defined in terms of pottery by the occurrence of polychrome painted ware, has been avoided in the pottery catalogue. There are no known type-fossils other than the painted ware which can be proved conclusively to belong to the 'Jamdat Nasr period'. Moreover painted ware defined as Jamdat Nasr has not been found at Abu Salabikh which constitutes approximately two thirds of the pottery corpus. Instead, material from sites other than Jamdat Nasr itself is catalogued as either late Uruk or ED I, on the basis of fabric type. For consistency the vessels from Jamdat Nasr which are not painted have been termed ED I on the basis of their fabric classification.

The dating of pottery from Kish and Abu Salabikh has benefited from publication of the excavated material (Mackay 1925, 21-37; 1929, 229-264; McAdam 1983, 53-86; Moorey 1966, 18-51; 1978, 61-75, 89-91, 99-104; Postgate 1978, 77-87; Postgate and Moon 1982, 103-106; Postgate and Moorey 1976, 133-149).

TYPOLOGICAL CLASSIFICATION (COLUMN 4)

The range of material examined has necessitated a detailed and comprehensive system of classification. In the interests of continuity a method has been devised based on typological attributes which serve to identify each individual sample whilst at the same time forming the basis of a systematic arrangement of pottery forms.

Numerical classification is therefore derived from a typology based primarily upon vessel function. This has been arranged in a tabulated form (Table 8.1) accompanied by illustrations of the major typological categories (Figs. 8.1 - 8.12). There are sixteen main types ranging from bowls (Type 1, Figs. 8.1 - 8.4) and jars (Type 2, Figs. 8.5 - 8.10) to body sherds (Table 8.1, Type 8) and bases (Table 8.1, Type 14). A system of decimalisation has been used to indicate the sub-groups within each principal pottery type and these sub-groups are determined by size including, for example, small, medium and large jars. Further sub-divisions have been dictated by rim shape and by decoration.

Many of the entries have more than one typological grouping listed in column 4. Examples include jar rim sherds with both impressed and reserve-slipped decoration. Thus for Sample 1942 the entry under column 4 reads: 2.4.2.5; 8.6.2; 8.9.1.

No attempt has been made to subdivide the upright-handled jars (Table 8.1, Type 9 and Fig. 8.12). It has been widely suggested that differences in decoration of the handles may constitute a dating criterion (Delougaz 1952, 87-91; Moorey 1978, 67; Moon 1982, 45-46) and further that the size and position of handles may be used as additional chronological indicators (Moon 1981, 72-73; Whelan 1981, 96). For the purposes of classification, however, the date entered in column 3 of the catalogue is based upon an examination of the fabric. It has proved more feasible, however, to subdivide the stemmed dishes on the basis of decoration (Table 8.1, Type 10 and Fig. 8.12). Stemmed dish rim and base sherds are usually grouped separately with the exception of stemmed dish sherds which come from a single grave group. For example, Sample 1155 (Table 8.4) is grouped under the subdivision 10.2.1 rather than under 10.7.3 (stemmed dish rims) since it forms part of the same grave group as 1154. One difficulty is that the term 'hollow stand' may apply to sherds from the stems of stemmed dishes, but there is no possibility of isolating such examples and it must be assumed that there is an inherent bias in the quantification of this group of pots.

Whenever possible the catalogue adheres to recognised pottery types from each period. Reference has been made to the comprehensive pottery typology published by Delougaz (1952) and to the pottery types illustrated by Hall and Woolley (1927, pl. 55-61); Mackay (1925, pl. 9-16; 1929, pl. 48-54; 1931, pl. 63-79); Martin (1982, 145-185); McAdam (1983, 53-86); Postgate and Moon (1982, 103-136); and Woolley (1934, pl. 251-267).

It has become customary for excavations to refer to pottery types published in the Diyala sequence (Delougaz 1952) and to vessel types from Ur and al 'Ubaid (Hall and Woolley 1927; Woolley 1934) and from Kish and Jamdat Nasr (Mackay 1925; 1927 and 1934). A concordance of vessel types (Table 8.2) has therefore been prepared which correlates the different terminology used in each publication with the classification of vessel types produced for this pottery corpus.

Sherds

Three major groups of sherds have been included in the typological classification, namely rim sherds, decorated body sherds, and base sherds.

2.4.1.1. Rim sherds

In order to retain continuity, rim sherds have been divided into bowl rim sherds (Type 1.14) and jar rim sherds (Type 2.4) so that they can be attributed to the separate categories of bowls and jars as subdivisions of each main group.

No separate category has been used for the conical bowl rim sherds, solid-footed goblet rim sherds and bevel-rim bowl sherds. Most of these rim sherds are from Abu Salabikh and where complete conical bowls do occur they are usually from grave groups. These are cited in column 2, under their batch number in conjunction with an object number for the grave.

In certain circumstances - where, for example, the base of a jar is missing but the jar can be identified as belonging to a specific group such as small jars (2.1) or spouted jars (5) - the vessel has been listed under the principal group followed by a sub-group giving the rim type.

2.4.1.2 Decorated body sherds (jars) (Type 8)

The decorated body sherds form the largest group in the tabulation of pottery types and many of the sub-divisions are cited in conjunction with whole pots where these are decorated. Where the decorated body sherd is thought to be part of an upright-handled jar the subdivision for the specific type of decoration is recorded below the classification for upright handled jars (Type 9) followed by a question mark.

2.4.1.3. Base sherds (Type 14)

Base sherds have been categorised separately since it is frequently impossible to distinguish between base sherds from bowls and those belonging to jars. String-cut bases, for example, are common to both conical bowls and small jars. If it has been possible to identify string-cut bases from conical bowls and string-cut bases from solid-footed goblets, then the pottery type is noted in brackets next to the base type.

Large jars are frequently manufactured with added ring bases and the presence of an added ring base is noted under the jar type in column 4.

Painted ware

In defining the difference between monochrome and polychrome, it is usual to confine these terms to the consideration of applied paint only. The combination of applied paint with applied slip is clearly equally important. Thus the application of a white slip in combination with painted decoration of a single colour (e.g. red) should be considered as two-toned and therefore polychrome. The distinction between monochrome and polychrome is that the former indicates a pot which is a uniform colour all over and the latter is decorated with a design of one or more colours applied over a slip.

Table 8.1 Third millennium Mesopotamian ceramics: numerical classification of vessel types

- 1 BOWLS
 - 1.1 Conical Bowls
 - 1.2 Transitional bowls
 - 1.2.1 Transitional bowls: cut rim
 - 1.2.2 Transitional bowls: flared rim
 - 1.2.3 Transitional bowls: bevelled rim
 - 1.2.4 Transitional bowls: 'flower-pot'
 - 1.3 Goblets
 - 1.3.1 Footed goblets
 - 1.3.2 Solid-footed goblets
 - 1.3.3 Goblets: other
- BRB Bevel-rim bowl
- 1.4 Cups
 - 1.4.1 Cups: flat base
 - 1.4.2 Cups: round base
 - 1.4.3 Cups: round base, tall
- 1.5 Large bowls: flat base
 - 1.5.1 Platters
 - 1.5.2 Dishes
- 1.6 Round-based bowls/basins
 - 1.6.1 Round-based bowls: small
 - 1.6.2 Round-based bowls: large
- 1.7 Ring-based bowls
 - 1.7.1 Ring-based bowls: large
 - 1.7.2 Ring-based bowls: small
- 1.8 Band-/collar-rim bowls
- 1.9 Sieve bowls
 - 1.9.1 Sieve bowls: flat base
 - 1.9.2 Sieve bowls: round base
 - 1.9.3 'Ladle'
 - 1.9.4 'Strainer'
- 1.10 Moulded bowls
 - 1.10.1 Moulded bowls: round
 - 1.10.2 Moulded bowls: square
- 1.11 Bowls with perforated rim
- 1.12 Grey burnished bowls
- 1.13 Painted bowls
- 1.14 Bowl rim sherds
 - 1.14.1 Bowl sherds: fine; plain rim
 - 1.14.2 Bowl sherds: fine; rolled rim
 - 1.14.3 Bowl sherds: medium; plain rim
 - 1.14.4 Bowl sherds: medium; cut rim

- 1.14.5 Bowl sherds: medium; dished rim
- 1.14.6 Bowl sherds: medium; bevelled/everted rim
- 1.14.7 Bowl sherds: large rims
- 1.14.8 Vertical-sided bowls (see also 1.17)

1.15 Large bowl sherds: coarse ware rims

- 1.15.1-8 Miscellaneous bowl sherds; coarse ware
- 1.15.9 Bowl sherds: coarse ware; shallow dish
- 1.15.10 Bowl sherds: coarse ware rims, decorated rib

1.16 Decoration on bowls

- 1.16.1 Incised, cross-hatched decoration on rim
- 1.16.2 Cable/pie crust decorated bowl rim
- 1.16.3 Cable decorated rib, below rim
- 1.16.4 Notched decoration below rim
- 1.16.5 Wavy-line decoration on rim
- 1.16.6 Ridged (see grosse-blumentopf (GB))

1.17 Spouted bowls

2 JARS

2.1 Small jars

- 2.1.1 Small jars: flat base (string-cut)
 - 2.1.1.1 Small jars: flat base (string-cut), plain rim
 - 2.1.1.1.1 Narrow body
 - 2.1.1.1.2 Short neck, long body
 - 2.1.1.1.3 Short, wide neck, squat body
 - 2.1.1.1.4 Flat, scraped base
 - 2.1.1.1.5 Carinated shoulder
 - 2.1.1.1.7 Ribbed shoulder
 - 2.1.1.2 Small jars with rim: flat base (string-cut)
 - 2.1.1.2.1 Bevelled rims
 - 2.1.1.2.1.1 Bevelled rims, decorated shoulder
 - 2.1.1.2.2 Everted rims
 - 2.1.1.2.2.1 Everted rims, decorated shoulder
 - 2.1.1.2.3 Band rims
 - 2.1.1.2.4 Grooved rims
 - 2.1.1.2.5 Perforated neck/shoulder
 - 2.1.1.2.6 Perforated base
- 2.1.2 Small jars: round base
 - 2.1.2.1 Small jars: round base, plain rim
 - 2.1.2.2 Small jars: round base, bevelled/everted rim
 - 2.1.2.3 Small jars: round base, perforated neck
 - 2.1.2.4 Small jars: round base, perforated
- 2.1.3 Small jars: ring base

2.2 Medium jars

- 2.2.1 Medium jars: round base
 - 2.2.1.1 Medium jars: round base, hole-mouthed
 - 2.2.1.2 Medium jars: round base, plain rim

- 2.2.1.3 Medium jars with rim: round base
- 2.2.1.4 Medium jars: round base, band rim
- 2.2.1.5 Medium jars: round base, perforated
- 2.2.1.6 Medium jars: round base, ribbed and carinated shoulder
- 2.2.1.7 Medium jars: ovoid; narrow neck
- 2.2.1.8 Medium jars: ovoid; wide neck

2.2.2 Medium jars: flat base

- 2.2.2.1 Medium jars: flat base, plain rim
- 2.2.2.2 Medium jars: flat base, round body
- 2.2.2.3 Medium jars: flat base (occasionally string-cut); bevelled/band rim
- 2.2.2.4 Medium jars: flat base, lugged decoration
- 2.2.2.5 Medium jars: flat base, carinated shoulder
- 2.2.2.6 Medium jars: flat base, ribbed at shoulder carination
- 2.2.2.7 Medium jars: flat base, lipped rim
- 2.2.2.8 Medium jars: flat base, perforated neck

2.2.3 Medium jars: ring base

- 2.2.3.1 Medium jars: ring base, plain rim
- 2.2.3.2 Medium jars: ring base, everted rim
- 2.2.3.3 Medium jars: ring base, band rim
- 2.2.3.4 Medium jars: ring base, squat, wide-mouthed
 - 2.2.3.4.1 Medium jars: ring base; squat with perforated rim
- 2.2.3.5 Medium jars: ring base; ribbed, carinated shoulder

2.3 Large jars

2.3.1 Large jars: flat base

- 2.3.1.1 Large jars: flat base, plain rim
- 2.3.1.2 Large jars: flat base, everted rim
- 2.3.1.3 Large jars: flat base (narrow), carinated shoulder

2.3.2 Large jars: convex base

- 2.3.2.1 Large jars: convex base, plain rim
- 2.3.2.2 Large jars: convex base, bevelled rim
- 2.3.2.3 Large jars: convex base, tall neck with everted rim
- 2.3.2.4 Large jars: convex base, band rim
- 2.3.2.5 Large jars: convex base, perforated
- 2.3.2.6 Large jars: convex base, carinated shoulder

2.3.3 Large jars: round base

2.3.3.1 Large ovoid jars

2.3.4 Large jars: ring base

- 2.3.4.1 Large jars: ring base, plain rim
- 2.3.4.2 Large jars: ring base, bevelled, everted or hatchet rim
- 2.3.4.3 Large jars: ring base, collar/band rim
- 2.3.4.4 Large jars: ring base, collar/band rim; wide neck

- 2.3.4.5 Large jars: ring base, ribbed neck
- 2.3.4.6 Large jars: ring base, ribbed shoulder
carination
- 2.3.4.7 Large jars: ring base, rib applied high on
shoulder

2.4 Jar rim sherds

- 2.4.1 Jar rim sherds: hole-mouthed
- 2.4.2 Jar rim sherds: short neck
- 2.4.3 Jar rim sherds: long neck
- 2.4.4 Jar sherds: rolled rim
- 2.4.5 Jar sherds: bevelled rim
- 2.4.6 Jar sherds: collar/band rim
- 2.4.7 Jar sherds: collar/band rim; dished/grooved
- 2.4.8 Jar sherds: flat rim
- 2.4.9 Jar sherds: coarse ware rims

2.5 Jar rims: decorated

- 2.5.1 Jar rims: cable decoration
- 2.5.2 Jar rims: notched decoration (on rim swellings)

2.6 Lids

- 2.6.1 Flat lids
- 2.6.2 Rounded 'lids'/'bungis' (sometimes interpreted as
net-floats)

3 BOTTLES

3.1 Bottles: bevelled rim

3.2 Bottles: everted rim

3.3 Bottles: long neck

- 3.3.1 Bottles: long neck and bevelled rim

3.4 Bottles: carinated shoulder and square body

3.5 Bottles: carinated shoulder

3.6 Bottles: ovoid body

3.7 Bottles: multi-ribbed

4 'DRINKING' BOTTLES

4.1 'Drinking' bottles: double-mouthed

4.2 Pilgrim flasks

5 SPOUTED JARS

5.1 Spouted jars: flat base

- 5.1.1 Small spouted jars: flat base
- 5.1.2 Spouted jars: flat base, round body
- 5.1.3 Spouted jars: flat base, carinated shoulder
- 5.1.4 Spouted jars: flat base, round shoulder, tall
- 5.1.5 Spouted jars: flat base, reserve slip decoration
on shoulder
- 5.1.6 Spouted jars: flat base, tall bottle-neck

- 5.2 Spouted jars: convex base
 - 5.2.1 Spouted jars: convex base, round shoulder, tall (short spout)
 - 5.2.2 Spouted jars: convex base, carinated shoulder
- 5.3 Spouted jars: ring base
 - 5.3.1 Spouted jars: ring base, plain rim
 - 5.3.2 Spouted jars: ring base, bevelled rim
 - 5.3.3 Spouted jars: ring base, carinated shoulder
- 5.4 Spouted jars: pinched ring base
 - 5.4.1 Spouted jars: pinched ring base, flared rim
 - 5.4.2 Spouted jars: pinched ring base, bevelled rim
 - 5.4.3 Spouted jars: pinched ring base, ribbed shoulder carination
- 5.5 Spouted jar: nipple-lug(s) on shoulder
- 5.6 Other spouted jars
- 5.7 Spouted jar sherds: spouts
 - 5.7.1 Short spouts
 - 5.7.2 Long spouts
 - 5.7.3 Conical spouts
 - 5.7.4 Upswept spouts
 - 5.7.5 Downswept/drooping spouts
 - 5.7.6 Spouts attached to rim
 - 5.7.7 Double spouts
 - 5.7.8 Plugged spouts
 - 5.7.9 Double spouts
- 6 WING-LUGGED JARS
 - 6.1 Small wing-lugged jars
 - 6.1.1 Small wing-lugged jars: plain lug
 - 6.1.2 Small wing-lugged jars: perforated lug
 - 6.2 Wing-lugged jars: pinched ring base
 - 6.3 Large wing-lugged jars: added ring base
- 7 FOOTED/CUP-BASED JARS (PEDESTAL JARS)
 - 7.1 Footed jars: plain
 - 7.2 Footed jars decorated with white inlay
- 8 BODY SHERDS (JARS)
 - 8.1 Rouletted decoration
 - 8.2 Gouged decoration
 - 8.3 Combed decoration
 - 8.3.1 Combed decoration: horizontal lines
 - 8.3.2 Combed decoration: diagonal lines
 - 8.3.3 Combed decoration: 'wicker-work'
 - 8.3.4 Combed decoration: horizontal-cross-vertical
 - 8.3.5 Combed decoration: diagonal-cross-vertical

8.4 Lugged jar sherds

- 8.4.1 Lugged jar sherds: lug perforated
 - 8.4.1.1 Small perforated lug
 - 8.4.1.2 Large perforated lug
 - 8.4.1.3 Large perforated lug, cross-hatched decoration on shoulder
 - 8.4.1.4 Vertical rectangular lugs (perforated); triangular notched decoration on shoulder
 - 8.4.1.5 Perforated lug; rib with notched decoration
- 8.4.2 Lugged jars sherds: plain lug
 - 8.4.2.1 Small plain lug(s)/nipple(s)
 - 8.4.2.2 Large, plain, horizontal lug; cross-hatched decoration on shoulder
 - 8.4.2.3 Several vertical lugs
 - 8.4.2.4 Horizontal row of small lugs
 - 8.4.2.5 Multi-lugged (see No. 2829)

8.5 Incised decoration

- 8.5.1 Incised decoration: combed
- 8.5.2 Incised decoration: cross-hatched
- 8.5.3 Incised decoration: flora and/or fauna
- 8.5.4 Incised decoration: herring-bone
- 8.5.5 Incised decoration: 'wavy-line'
- 8.5.6 Incised decoration: 'vertical lines'
- 8.5.7 Incised decoration: cross-hatched triangles
- 8.5.8 Incised decoration: zig-zag

8.6 Impressed decoration

- 8.6.1 Impressed decoration: horizontal row of triangular notches
 - 8.6.1.1 Impressed decoration: more than one row of triangular notches
- 8.6.2 Impressed decoration: finger-nail nicks (pricked)
 - 8.6.2.1 Impressed decoration: more than one row of finger-nail nicks (pricked)
- 8.6.3 Impressed decoration: vertical downstrokes (probably made with fingers)
- 8.6.4 Impressed decoration: zig-zag, rocker pattern
- 8.6.5 Impressed circles
- 8.6.6 Reed impressed decoration
- 8.6.7 Impressed decoration: horizontal row of lozenge shapes (rouletted)
- 8.6.8 Cable-impressed decoration: horizontal
- 8.6.9 Impressed decoration: herring-bone (see also 8.10)

8.7 Cut ware

- 8.7.1 Cut ware: ribbed with cross-hatched decoration and perforated lug
- 8.7.2 Cut ware with incised, cross-hatched decoration
- 8.7.3 Cut ware: fenestrated

- 8.8 Striated/grooved decoration (Tab-rim jars)
 - 8.8.1 Horizontal striated/grooved decoration
 - 8.8.2 Vertical striated/grooved decoration
 - 8.8.3 Horizontal-cross-vertical grooved decoration
 - 8.8.4 Horizontal grooves just above and/or below shoulder carination
- 8.9 Reserve-slipped decoration (on jar shoulders)
 - 8.9.1 Diagonal reserve slip
 - 8.9.2 Horizontal reserve slip
 - 8.9.3 Single, slipped, horizontal band
 - 8.9.4 Diagonal-cross-horizontal reserve slip
 - 8.9.5 Vertical reserve slip (see also 8.8.2)
 - 8.9.6 Alternate bands of horizontal and vertical reserve slip
- 8.10 Leaf-motif (herring-bone pattern, see 8.6.9)
- 8.11 Plain ribs (applied)
 - 8.11.1 Single plain rib on shoulder carination
 - 8.11.2 Several plain ribs on shoulder
 - 8.11.3 Lugs/tabs on plain rib
- 8.12 Decorated ribs: notched/nicked
 - 8.12.1 Single rib with notched/nicked decoration
 - 8.12.2 Several ribs with notched/nicked decoration
 - 8.12.3 Single rib with notched decoration; perforated at intervals
- 8.13 Decorated ribs: cable/pie crust
 - 8.13.1 Narrow cable rib ('fine' ware)
 - 8.13.2 Wide cable rib
 - 8.13.3 Cable rib: twisted/corded decoration
 - 8.13.4 Cable rib: vestigial
 - 8.13.5 Several cable ribs: vestigial
- 8.14 Cable rib: perforated body
- 8.15 'Well-type': combed, wavy-line decoration
- 8.16 Decorated coarse ware (large jars)
 - 8.16.1 Coarse ware: single plain rib
 - 8.16.1.1 Coarse ware: several plain ribs
 - 8.16.2 Coarse ware: single cable rib
 - 8.16.2.1 Coarse ware: several cable ribs (suggests decoration representing a harness of ropes)
 - 8.16.3 Coarse ware: incised decoration
 - 8.16.4 Coarse ware: lugged
 - 8.16.5 Coarse ware: perforated lugs
 - 8.16.6 Coarse ware: perforated

CONTEXT (COLUMN 5)

The archaeological context of each sample is indicated in column 5. Unfortunately in most cases there is no recorded context for the pottery from Ur. Wherever possible a context has been quoted from the British Museum registers in the Department of Western Asiatics, although this is usually confined to a grave letter. Occasionally the grave number (e.g. PG 90) has been written on the pot and this number has been quoted both under the context and with the site number (column 2).

The archaeological context for pottery from Kish has been quoted from the Ashmolean Museum registers and with reference to Mackay's publications of the assemblages from Kish (Mackay, 1925; 1929) and Jamdat Nasr (Mackay, 1931).

Pottery from Abu Salabikh is located by reference to column 5 where the excavated square is recorded (see Postgate 1978, 79, fig. 1; 1980, 96-97; 1982, 58, fig. 45 and 60, fig. 47; 1983, fig. 354; Postgate and Moon 1982, 129, fig. 9) and to column 2 where the batch number and level is recorded.

PUBLICATION (COLUMN 6)

References generally relate to published illustrations and only the excavation report or the most recent publication is quoted. More than one reference is given when it is considered worthwhile to compare these illustrated examples in the context of different publications.

Much of the pottery from Abu Salabikh has yet to be published. With the exception of occasional references to a similar pot type illustrated elsewhere there are no published references for pottery from the Main Mound. The pottery illustrated in the catalogue of the first 99 graves excavated at Abu Salabikh (Martin et al. 1985) was published after completion of the catalogue. Reference is made, however, to McAdam's illustrated types from the West Mound (McAdam 1983, 53-86).

FABRIC CLASSIFICATION (COLUMN 7)

Excavation reports are usually published with a detailed account of the pottery from the site, but all too often scant attention has been paid to the fabrics themselves. This may be partly owing to the apparent homogeneity of much of the pottery from third millennium sites, but fabrics are frequently overlooked as potential chronological indicators. In this pottery corpus the aim has been to include descriptions of the fabric categories to which vessels can be attributed as an integral part of the assessment.

Sixteen principal fabric types have been identified initially from a visual comparison providing information concerning the possible origin, type and ware. Further, more sophisticated, comparisons based on a microscopic examination of some six hundred samples provide more detailed evidence frequently diagnostic of source (see Section 8.3).

- A Fine sandy wares
- B Green-buff wares
- C Fine wares
- D Shell-tempered wares
- E Medium sandy wares
- F Shelly wares
- Grog tempered wares (Kish only)
- G Coarse sandy wares
- H Grey wares
- I Fine (levigated) wares
- J Medium sand-tempered buff wares
- K Coarse sand-tempered buff wares
- L Fine red wares
- M Coarse red wares
- N Medium vegetable tempered wares (BRB fabric)
- P Coarse vegetable tempered wares
- Q Very coarse sand and vegetable-tempered wares.

It is not always possible to obtain samples for thin sectioning and petrological analysis. Upright-handled jars and stemmed dishes have an intrinsic value which precludes sampling unless they are incomplete; the same frequently applies to any whole pot. Thin sections are therefore mainly derived from sherds, yet almost

every fabric identified in each assemblage is represented by a thin section.

Since a chronological and typological comparison of the pottery fabrics has been attempted, the principal fabric groups remain the same for each site. Thus Fabric A from Kish is similar to Fabric A from Ur and Fabric A from Salabikh. An attempt has been made to maintain this rationalisation throughout the fabric sub-groups, although some compensation has had to be made for variation between local clays from different sites.

In order to facilitate comparisons between pottery assemblages a concordance of fabric types has been prepared (Table 8.3) to indicate the presence or absence of individual fabric categories at each site included in the corpus. Thus it is immediately apparent that grey ware (Fabric Group H) is present principally in the pottery assemblages from Abu Salabikh. In this case it is restricted to the West Mound, indicating a chronologically early fabric type.

ANALYSIS (COLUMNS 8 - 11)

The remaining four columns of the catalogue are a record of analyses carried out on the pottery samples (Sections 8.3 and 8.4). The thin section number is recorded in column 8 and in some cases two thin sections have been taken from the same pot. Column 9 contains the neutron activation number which will appear on subsequent cluster analyses. Columns 10 and 11 are a record of photographic archive of pottery fabrics and thin sections respectively (see also Figs. 8.93 and 8.94).

Finally, an asterisk in column 12 indicates that the pot or sherd is illustrated and may be located by its sample number on the adjoining plates.

8.2.3 Late fourth and third millennium Mesopotamian ceramics :
classification and analysis

Table 8.4 has been organised in numerical order of sample reference number. Information included in column 7, 8 and 9 is discussed in detail in Sections 8.3 and 8.4.
