

Figura 3

Membrane stability and inhibition of lipid oxidation and cholesterol domain formation

Reduction in Remnant cholesterol (MARINE and ANCHOR studies)

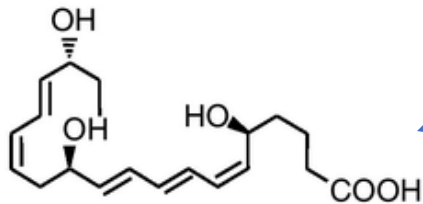

Eicosapentaenoic Acid, EPA 20:5n-3

CYP450

18*R*-hydroxyeicosapentaenoic acid

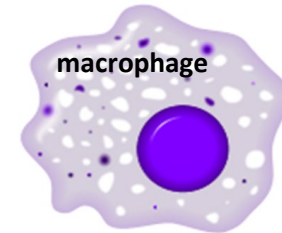

5-lipoxygenase

RvE1

Anti-inflammatory activity

Rise in cholesterol efflux via ABCA1

AND

EPA in the atherosclerotic plaque is inversely correlated with intima-media thickness of the plaque
