A Definitive Reference with an International Perspective

A field as diverse as optoelectronics needs a reference that is equally versatile. From basic physics and light sources to devices and state-of-the-art applications, the **Handbook of Optoelectronics** provides comprehensive, self-contained coverage of fundamental concepts and practical applications across the entire spectrum of disciplines encompassed by optoelectronics. The handbook unifies a broad array of current research areas with a forward-looking focus on systems and applications.

Beginning with an introduction to the relevant principles of physics, materials science, engineering, and optics, the book explores the details of optoelectronic devices and techniques including semiconductor lasers, optical detectors and receivers, optical fiber devices, modulators, amplifiers, integrated optics, LEDs, and engineered optical materials. Applications and systems then become the focus, with sections devoted to industrial, medical, and commercial applications, communications, imaging and displays, sensing and data processing, spectroscopic analysis, the art of practical optoelectronics, and future prospects. This extensive resource comprises the efforts of more than 70 world-renowned experts from leading industrial and academic institutions around the world and includes many references to contemporary works.

Whether used as a field reference, as a research tool, or as a broad and self-contained introduction to the field, the **Handbook of Optoelectronics** places everything you need in a unified, conveniently organized format.

Features

- Covers the breadth of knowledge necessary for a strong background in optoelectronics, including underlying concepts in physics and optics
- Offers comprehensive coverage that is pragmatically organized and extensively cross-referenced for easy access
- Focuses on systems and applications with a forward-looking, practical perspective
- Comprises the work of more than 70 accomplished experts from leading international industrial and academic institutions
- Includes numerous tables and illustrations to clarify the concepts

Catalog no. IP344, April 2006, c. 1600 pp.
ISBN: 0-7503-0646-7, \$875.00 / £499.00

Contents

Basic Concepts

Introduction
Optical Materials
Incandescent, Discharge, and Arc Lamp Sources
Detection of Optical Radiation;
Introduction to Optical Waveguides
Optical Amplifiers and Lasers

Advanced Concepts

Advanced Optics
Photometry
Nonlinear and Short Pulse Effects

Optoelectronic Devices and Techniques

LEDs
Semiconductor Lasers
Optical Detectors and Receivers
Optical Fiber Devices
Optical Modulators
Optical Amplifiers
Ultrafast Optoelectronics
Integrated Optics
Infra-Red Devices and Techniques
Organic LEDs
Holey Fibers and Photonic Crystals
Engineered Optical Materials

Communication

Optical Transmission
Optical Network Architecture
Optical Switching and Multiplexed Architectures

Imaging and Displays

Camera Technology
Vacuum Tube and Plasma Displays

See reverse for continuation of contents, other titles of interest, and ordering information

Contents continued

- Liquid Crystal Displays
- Spatial Light Modulators
- Electroluminescent Displays
- 3D Display Technology
- Optical Scanning, Transmission, and Printing
- Sensing and Data Processing**
- Optical Fiber Sensors
- Remote Optical Sensing and Measurement
- Military Optoelectronics
- Optical Information Storage and Recovery
- Optical Information Processing
- Industrial, Medical, and Commercial Applications**
- Spectroscopic Analysis
- Optical Surveillance, Safety, and Security
- Optical Actuation and Control
- Optical to Electrical Energy Conversions: Solar Cells
- Medical Applications
- The Art of Practical Optoelectronics**
- The Art of Practical Optoelectronics
- Index

Please use this ORDER FORM, CALL or ORDER ONLINE at WWW.CRCPRESS.COM

Please indicate quantities next to the title(s) ordered below:

HANDBOOK OF OPTOELECTRONICS

.....Catalog no. IP344, ISBN: 0-7503-0646-7 at \$875.00 / £499.00 each.

Other titles of interest:

ELECTRONICS, POWER ELECTRONICS, OPTOELECTRONICS, MICROWAVES, ELECTROMAGNETICS, AND RADAR

.....Catalog no. 7339, ISBN: 0-8493-7339-5 at \$99.95 / £56.99 each.

ENGINEERING THIN FILMS AND NANOSTRUCTURES WITH ION BEAMS

.....Catalog no. DK2964, ISBN: 0-8247-2447-X at \$139.95 / £79.99 each.

PHYSICS OF OPTOELECTRONICS

.....Catalog no. DK3205, ISBN: 0-8247-5385-2 at \$129.95 / £49.99 each.

Ordering Information: Orders must be prepaid or accompanied by a purchase order. Checks should be made payable to CRC Press. Please add the appropriate shipping and handling charge for each book ordered. All prices are subject to change without notice. If purchasing by credit card please be sure to include the 3 digit security code that appears on the back of your card in the "sec code" field provided below. **U.S./Canada:** All orders must be paid in U.S. dollars. TAX: As required by law, please add applicable state and local taxes on all merchandise delivered to CA, CT, FL, KY, MO, NY, and PA. For Canadian orders, please add GST. We will add tax on all credit card orders. **European Orders:** All orders must be paid in U.K. £. VAT will be added at the rate applicable. **Textbooks:** Special prices for course adopted textbooks may be available for certain titles. To review a book for class adoption, contact our Academic Sales Department or submit your textbook evaluation request online at www.crcpress.com/eval.htm **Satisfaction Guaranteed:** If the book supplied does not meet your expectations, it may be returned to us in a saleable condition within 30 days of receipt for a full refund.
